Wouldn't it be interesting if there was overlap between the Wikileaks insurance file and information retrieved from the Osama Bin Laden collections?

Especially, say, the massive "porn" collection found in Osama Bin Laden's possession that USIC refused to comment on?

Case 1:18-cr-00111-CMH Document 31 Filed 05/23/19 Page 11 of 37 PageID# 122

33. ASSANGE spoke about the purpose of this "insurance file," stating that it contained information that WikiLeaks intended to publish in the future but without "harm minimization," that is to say, without redactions of things, like names of confidential informants, that could put lives at risk. When asked how these insurance files could be used to prevent "prior restraint and other legal threats," ASSANGE responded that WikiLeaks routinely "distributed encrypted backups of material we have yet to release. And that means all we have to do is release the password to that material and it's instantly available. Now of course, we don't like to do that, because there is various harm minimization procedures to go through." But, ASSANGE continued, the insurance file is a "precaution[] to make sure that sort of material [the data in WikiLeaks's possession] is not going to disappear from history, regardless of the sort of threats to this organization."

34. Similarly, on August 17, 2013, WikiLeaks posted on its Facebook account: "WikiLeaks releases encrypted versions of upcoming publication data ('insurance') from time to time to nullify attempts at prior restraint." The post also provided links to previous insurance files and asked readers to "please mirror" the links, meaning to post the links on other websites to help increase the number of times the files are downloaded.

148 people are talking about this

Just a refresher: it is against the law to possess any form of child pornography in the US, even if it's encrypted. If you're found in possession of data that when decrypted, reveals child porn, even if you don't have the password yourself - you're screwed.

And if you're in possession of child porn that is being used to blackmail politicians and public figures that matches up with the content found in Osama Bin Laden's porn stash, you're going to be in even bigger trouble - 'cause he's def. a terrorist.

And if you use any passwords Wikileaks releases to decrypt the "insurance file," and it contains child pornography as material being used to blackmail government entities into submission, you deserve to get whatever punishment the boys on your cell block deem suitable.

So, some of the insurance files:

Insurance files have been released by WikiLeaks multiple times. One of those insurance files was released in June 2016:

Protect our coming publications. Torrent WIKILEAKS INSURANCE 2016-06-03 (88 Gb encrypted) <https://t.co/j4V8NH2Xmm>
pic.twitter.com/vwc9Pe0e0f

— WikiLeaks (@wikileaks) June 17, 2016

Another insurance file was released in February 2012.

Please bittorrent WikiLeaks Insurance release 2012-02-22 (65GB)
<http://t.co/iBE2siYx>

— WikiLeaks (@wikileaks) February 22, 2012

A different insurance file was released on December 19, 2016. We also don't know what the contents of that file are:

INSURANCE 2016-12 torrent <https://t.co/zi9lFO90T0> (83GiB)
SHA256:637f6996be1ea0153099d-
f79ba7b7e7be14d17965026f619acf139f9fd55382

— WikiLeaks (@wikileaks) December 19, 2016

And something interesting of note:

Vault 7 leaker Joshua Schulte, found with 54GB of child pornography in an encrypted container on his computer... with the password found on his phone?

Maybe that password was in an encrypted text message from Assange?

During the course of reviewing the Desktop Computer, CACS agents encountered a volume of files in an encrypted container, approximately 54 GB in size (the "Encrypted Container")

Kim Zetter ✓ @KimZetter

On or about March 15, 2017, members of FBI searched the Residence. During the course of that search, law enforcement officers recovered, among other things, multiple computers, servers, and other portable electronic storage devices, including SCHULTE's personal desktop computer [twitter.com/KimZetter/stat...](https://twitter.com/KimZetter/status...)

Didn't realize this before, but.... maybe Schulte wasn't distributing child porn to customers in the traditional sense after all.... what if the porn was in one of the wikileaks insurance files, and Assange gave him the password to decrypt it?

That would put a lot of his recent court activity trying to get some of the data out there in a MUCH different light.

Docket for United States v. Schulte, 1:17-cr-00548 - CourtListener.com

So... everyone in possession of the Wikileaks "insurance" files should consider just what might be in those archives that you could personally be held accountable for .

Just sayin'.
