1. Speculation: How could the [#Epstein](#) case be tied to the counterintelligence investigation? Remember the [#SteeleDossier](#) and its report of [#Putin](#) having Trump sexual [#Kompromat](#)? First, I never bought that it was the material reported. Trump is a [#pedophile](#) and Putin knows it.

2. Remember the recent amplification of "deep-fakes?" That is the problem with dropping a Trump sex video. It will be attacked as a fake and [#counterintelligence](#) folks can read the papers and see that there are efforts to distort the evidence that may know is coming. What to do?

3. Epstein travels a lot and I presume he is often caught by 702 and other intelligence services' intercepts. Has he ever used a code for Trump? Has he ever used a code for [#Kompromat](#)? The [#NSA](#) infrastructure can spot that. So if they knew that he has something on Trump the 702

4. would never come into court but it could be the basis for the warrant affidavit of probable cause. IMO Trump is a national security threat. Exposing him as a pedophile with evidence that could be attacked as a deep-fake fabrication would potentially harm national security.

5. But corroboration via evidence pulled from a Manhattan safe would neutralize the Russian disinformation attempt. Even if my speculation never pans out, one thing is certain. Epstein is in the [#SDNY](#). And if he doesn't give Trump up he won't get a deal and is looking at life.

6. And life in a high-security prison for people who rape children is a long life indeed. I expect this case to move fast. The federal lockup is also not a fun place for child rapists. Epstein is a sociopath and has no concept of loyalty. He will move to flip on Trump to buy

7. a ticket into the witness protection program.
